F O R E W O R D

Export marketing research is a subject of considerable interest to our Department, to Ontario manufacturers and to businessmen who may be interested in exports. The Foreign Market Studies which are undertaken by our Section, are written for the use of our Trade and Industry Division, and specifically by our Marketing Branch and Trade Mission members. These studies depict the economic background of the countries that will be visited. For this reason our Foreign Market Studies are, in the first instance, working documents designed for the use of the Department and cannot be taken in their entirety as expressing the opinion or position of the Department of Trade and Development.

INTRODUCTION

The U.K. retains an important position among the world's leading industrial nations and remains one of the world's major financial centres. The U.K. is the second largest country, after West Germany, by population in Western Europe. In 1969 her G.N.P. was \$118.8 billion, 6th highest in the world. In 1971 it is anticipated the real growth of the U.K's G.N.P. will be about 3%.

The U.K's economy has grown at only half the rate of other industrial countries for the past two decades. She now ranks 13th in standard of living in the world, as compared to second in 1940 and eight in 1960*.

The Government is an active participant in many economic sectors including steel, coal, railroads, airlines and communications. It is the declared intention of the Government to try to denationalize some of these industries.

Trade is of vital importance to the U.K's economy and Britain is among the world's major trading nations depending upon imports for half her food requirements and nearly all her raw materials. In 1970 U.K. exports totalled \$20.8 billion and imports totalled \$23.3 billion. An unfavourable trade balance is a recurring problem for the U.K. and she continuously strives to improve her export performance. During the past few years Britain's trade has become more oriented towards Western Europe. Britain is a member of E.F.T.A. and is currently negotiating for entry into the E.E.C.

GENERAL INFORMATION

a. Geography and Climate

The United Kingdom, composed of England, Wales, Scotland and Northern Ireland (the first three constitute Great Britain) has a total area of 94,216 square miles. It ranks 75th in size among countries of the world with about 0.18% of the world's land area.

The U.K. is situated north west of the European mainland and is separated from Europe by the English Channel and North Sea.

Great Britain can be roughly divided into two areas:

1. The Lowlands comprise the eastern, southern and midland sections of England.
2. The Highlands comprise Scotland, most of Wales, the broad uplands known as the Pennines and the Lake District in the north west of England.

Approximately two-fifths of the population live in urban or suburban areas.

London, the capital city, is one of the three largest cities in the world (with Tokyo and New York), one of the three major ports (with New York and Rotterdam) and one of the most important financial centres in the world. It has a population of 7.8 million people.

Other major cities, centres of important industrial and manufacturing activities, are Birmingham (1.07 million), Manchester (603,000), Liverpool (688,000), Glasgow (949,000), Sheffield (532,000) and Leeds (506,000).

Chief ports after London are Liverpool and Southampton. There are approximately 300 ports in the U.K.

The U.K. has a temperate and equable climate; rainfall ranges between 33 and 50 inches, evenly distributed throughout the year.

b. Human Resources

The population of the U.K. in 1969 was 55.5 million. Britain's population density, 589 persons per square mile, is one of the highest in the world. Population estimates for 1980 and 2000 are 59.2 million and 68.1 million.

Area and Population 1969

	<u>Area</u> Sq.miles	<u>Population</u> '000s
England and Wales	58,350	48,827
Scotland	30,414	5,195
Northern Ireland	5,452	1,512
Total U.K.	<u>94,216</u>	<u>55,534</u>

Age Composition of the Population 1969

	<u>Percentage</u>
Under 15	24
15-64	63
65+	13

Women account for over half the population (51.3%).

Approximately one-half of the British population lives within an ellipse drawn across England enclosing south Lancashire and west Yorkshire at one end, the London area at the other and the industrialized Midlands at its centre.

About 40% of the population lives in or near eight main urban areas.

There have been two main periods of immigration into Britain since 1931. Between 1931 and 1940 there was considerable immigration from the Irish Republic and Europe, while in the 1950's and early 60's there was a large inflow from Commonwealth countries, particularly the West Indies, India and Pakistan. In 1962 the Commonwealth Immigrants Act restricted the number of people from the Commonwealth who did not have means of self-support. In 1968 this control was extended to those who have no close link with Britain.

In 1968 some 236,000 immigrants entered Britain of which 178,000 came from the Commonwealth. British emigrants numbered about 281,000 of which approximately 243,000 moved to Commonwealth countries. Further restriction regarding Commonwealth immigration could be expected.

In 1969 the working population was 25 million people, 45% of the total population. The size of the working population has decreased since 1966 due to people staying in education, married women not working and a reduction in immigration.

With the raising of school-leaving age in 1973 to 16, further growth in the working population is not expected until 1976.

The U.K. unemployment rate has increased from 1.5% in 1965 to as high as 2.8% in 1970. Unemployment is unevenly distributed and for several years has been a problem in Scotland, Wales and the north-east of England. This is due to the decline of some traditional industries (e.g. textiles) in these areas and to the tendency for new industries to concentrate in the Midlands and south-east England. In 1969 southern England had 1.9% unemployment compared to 5.2% in northern England and 8% in Northern Ireland.

STRUCTURE OF THE ECONOMY

a. Agriculture, Fishing and Forestry

Although agriculture, fishing and forestry taken together occupy only 1.6% of the working population, agriculture is one of the most important industries in the U.K. Britain today produces half of its total food requirements as compared to one-third before the Second World War. Although there has been a significant decline in agricultural workers during the past 8 years, production has increased due to a much higher degree of mechanization.

Almost half the total output comes from large "commercial holdings" and recent legislation is designed to encourage further amalgamation by small farmers. Over 48 million acres are being farmed at the present time, but this area is gradually decreasing to meet the needs of housing and industry.

The proportion of imports of foodstuffs to total imports has fallen greatly over the past years, but Britain is still a major market for foodstuffs. In 1969 agricultural imports represented 23% of total imports.

In the past, farmers have been supported through deficiency payments (income supports). This system has now been abolished and levies on imported food have been introduced.

Principal crops in the U.K. are wheat, barley and sugar beet.

U.K. Agricultural Production Million tons

	<u>1967</u>	<u>1968</u>	<u>1969</u>
Wheat	3.8	3.4	3.3
Barley	9.0	8.1	8.6
Oats	1.3	1.2	1.3
Sugar beet	6.7	7.0	-
Potatoes	7.1	6.7	6.1

Source: U.K. Annual Abstract of Statistics

The livestock population of the U.K. in 1969 was: cattle 12.3 million, sheep 26.6 million, pigs 7.7 million and poultry 127.2 million.

The U.K. is among the principal fishing nations of Western Europe. In 1969 the fishing catch amounted to 930,200 tons valued at \$168.8 million. The principal fish products are white fish (cod, haddock, plaice, sole), herring and shellfish.

The U.K.'s productive forests cover about 6% of the total land area. Reforestation is being undertaken on an additional 1.07 million acres of unproductive woodland, legacy of two world wars, but it is unlikely that all this area will be replanted. Since 1945 the unproductive woodland area has been reduced by 300,000 acres. The U.K. forests make only a limited contribution to the nation's wood and wood products requirements and Britain imports 90% of these needs. Canada is an important supplier.

b. Mining

Production of the mining and quarrying industries in the U.K. declined 20% between 1963 and 1969, and in 1969 these industries employed only 1.8% of the working population.

Except for coal, the U.K. is poor in natural resources. Coal mining, by far the most important of the U.K. extractive industries, is operated as a single co-ordinated enterprise under the National Coal Board which was established in 1947. Nearly all other mining and quarrying - sand, gravel, salt, tin, oil and china clay - is undertaken by private enterprises. Although many of the major coal seams have now been worked out, there are still abundant reserves. The main coal-bearing areas are:

1. The Yorkshire, Derbyshire and Nottingham field (48%)
2. The Durham and Northumberland Field
3. South Wales
4. Scottish fields
5. Lancashire and West Midlands

Coal consumption in Britain has dropped sharply since 1956 due to growing competition from oil and reduced requirements from other industries. This trend is likely to continue. Coal production decreased in 1969 to 152.7 million metric tons from 166.7 million metric tons the previous year.

United Kingdom Mineral Production 1967-1969

	'000 tons		
	<u>1967</u>	<u>1968</u>	<u>1969</u>
*Coal (metric tons)	174,900	166,716	152,796
*Iron Ore (metric tons)	12,948	13,932	12,300
*Tin (metric tons)	1.5	1.8	1.6
Crude Petroleum	87	80	-
Salt Rock	692	1,088	1,395
China Clay	2,611	2,793	2,784
*Natural gas (million cubic metres)	648	1,704	1,944

Source: *U.N. Monthly Bulletin of Statistics; Annual Abstract of Statistics.

Iron ore production in 1969 was 12.3 million tons as compared to 13.9 in 1968.

Domestic production of crude petroleum meets only a small proportion of total U.K. requirements, with imports meeting the remaining needs. 1968 oil production amounted to 80,000 tons, a decrease from 87,000 in 1967.

Important discoveries of natural gas have been made recently in the North Sea and northeast England. in 1969 natural gas production increased to 1.9 billion cubic metres from 1.7 billion cubic metres in 1968.

c. Manufacturing

The U.K. is one of the most highly industrialized countries in the world and a major exporter of manufactured goods.

Although most industry is in the hands of private enterprise, some sectors are nationalized such as steel (the British Steel Corporation), coal (the National Coal Board), atomic energy (Atomic Energy Authority) and the electrical and gas industries. The government also has substantial (sometimes 100%) equity in enterprises incorporated in the same way as privately owned corporations, such as British Petroleum (49%), Cook's Travel (100%). In 1969 nationalized industries accounted for 11% of gross domestic product and employed about 7% of the work force. It is the declared intention of the Conservative government to try to denationalize some of those concerns.

Industry has tended to settle in the Midlands and southeast England which have become increasingly congested. Industrial Development Certificates, required to build new plants, are rarely granted in these areas now. In 1966 large parts of Britain were designated "development areas" and a variety of inducements provided to encourage industry to settle there.

In 1970 the policy of capital investment grants and subsidies to employers in these areas was replaced by tax cuts and depreciation allowances.

Manufacturing output has increased 26% since 1963 and in 1969 accounted for approximately 35% of the G.D.P.

The main concentration of industry by areas is as follows:

1. London: Wide range of manufacturing industries
2. Midlands: Engineering and metal-using industries, vehicles, coal, pottery, textiles, boots and shoes, chemicals.
3. Yorkshire: Wool textiles, coal, steel, engineering and metal manufacture, clothing.
4. Lancashire: Engineering, cotton textiles, man-made fibres, coal, shipbuilding, chemicals, glass, clothing.

5. South Wales: Coal, steel tinplate, non-ferrous metals, chemicals.
6. North-east Coast of England: Coal, steel, engineering, shipbuilding, chemicals.
7. Clydeside and Central Lowlands (Scotland): Engineering, shipbuilding, coal, steel, textiles, vehicles.
8. Northern Ireland: Engineering, shipbuilding, linen and man-made fibres.

Steel

The U.K., together with France and Germany, is one of the major steel producing countries in Western Europe. Britain has some of the most modern plants in Europe and the emphasis is increasingly on improving efficiency rather than total capacity. The publicly-owned British Steel Corporation produces over 90% of the crude steel produced and employs 70% of the manpower in the steel industry. In 1969 crude steel production was 26.8 million metric tons compared to 26.3 million metric tons in 1968*. Deliveries of finished steel amounted to 21.6 million tons, an increase over 20.7 million tons in 1968.

The main producing districts are South Wales (25% of total crude steel output) the north east of England (16%), Sheffield and district (13%), Scotland and Lincolnshire (each 12%) and Lancashire and Flintshire (each 10%). South Wales concentrates on the manufacture of flat products, especially sheet steel and tinplate, Scotland on heavy steel products (plates, sections and rails) and Sheffield is a centre of production for special alloys and steel.

The following table shows production of some semi-finished and finished iron and steel products 1967-1969.

Production of Selected Semi-finished and Finished
Iron and Steel Products 1967-1969

	<u>1967</u>	<u>1968</u>	<u>1969</u>
Steel castings	469	476	507
Iron casting	3,546	3,557	3,756
Blooms, billets, slabs	11,057	12,003	13,099
Heavy and medium plates	2,998	3,256	3,592
Sheets coated and uncoated	3,779	4,332	4,370
Light rolled products	6,125	6,720	7,319

The Non-ferrous metals industry is one of the largest in Europe and as a consumer of aluminium, copper and lead Britain is second only to the U.S. among Western countries. Approximately half

*Source: U.N. Monthly Bulletin of Statistics

the industry is situated in the Midlands, other centres being South Wales, London, Tyneside and Avonmouth. One of the world's largest and most advanced zinc smelters came into operation in 1968 and two major aluminium smelters are being built. The industry is also a major producer of newer alloys. The United States, West Germany and Italy are principal purchasers of the products of this industry.

The Mechanical Engineering Industry, comprises a wide range of industries including all types of machinery, machine tools, mechanical handling equipment, construction equipment, and scientific instruments and is a major contributor to U.K. industrial output. Production in this industrial sector has increased 31% since 1963 and in 1969 this industry employed 1.3 million people.

The following table shows deliveries of some of the important products of this industry.

Deliveries of Mechanical Industrial Products
\$'000,000

	<u>1967</u>	<u>1968</u>	<u>1969</u>

The Motor Vehicles Industry was at one time located mainly in the Midlands and London areas, but during the last decade manufacturing and assembly plants have been established on Merseyside, and in Wales and Scotland. Four large firms (British Leyland, Ford, Rootes and Vauxhall) account for over 95% of complete vehicle production, the balance being produced by firms specializing in heavy commercial vehicles, buses, limousines and sports cars. The industry involves about 809,000 workers. Production of passenger cars in 1969 was 1.7 million units and of commercial vehicles was 466,000.

U.K. Production of Motor Vehicles 1967-1969
000's units

	<u>Passenger Cars</u>	<u>Commercial</u>
1967	1,552	385
1968	1,816	409
1969	1,717	466

Source: U.N. Monthly Bulletin of Statistics

The U.K. is the third largest producer of commercial vehicles after Japan and the U.S. and the fifth largest producer of passenger cars.

The Chemical Industry has almost doubled production between 1963 and 1969 and in 1969 its exports were approximately 10% of total exports. It has developed one of the the largest petrochemical industry in Europe. Products include chemicals, the major one being sulphuric acid, dyes, fertilizers and pesticides, drugs, paints, varnishes, synthetic resins and plastics. The following table shows production figures for some of these products.

Selected Products of the Chemical Industry 1967-1969
'000 tons

	<u>1967</u>	<u>1968</u>	<u>1969</u>
Sulphuric Acid	3,182.7	3,282.3	3,234.7

Source: U.K. Annual Abstract of Statistics: Monthly Digest of Statistics

The Textile Industry expanded production 23% between 1963 and 1969. Britain remains an exporter of woollens but production is small now compared to that of man-made fibres. Production of man-made fibres is the most rapidly expanding branch of the textile industry and in 1969 production was 1,221 million lbs.

Production of selected textile products in the U.K. 1967-1969 was as follows:

Production of Selected Textile Products 1967-1969

	<u>1967</u>	<u>1968</u>	<u>1969</u>
Woven cloth of cotton, man-made fibres and mixtures: mn Linear yds.	1,274	1,290	1,290
Woven wool and mixture fabrics (deliveries)	295	295	286
Man-made fibres: mn lbs.	955	1,189	1,221

Source: E.I.U. Annual Supplement

The main locations of the textile industries are: the Midlands and Yorkshire (wool), Lancashire (cotton and man-made fibres), Northern Ireland (linen) and the central lowlands of Scotland.

Source: Europa Year Book 1970

Employment in the manufacturing industry as a whole was 35% of the total working population in 1969.

The engineering and electrical goods industries employed 26.6% which represents the largest segment of the working population involved in manufacturing industries. The textile, leather and clothing industries together employed 14.3%. Chemical and allied industries employed 5.9% and vehicle production involved 9.3%.

d. Finance

The Bank of England, the central bank for the U.K., was brought into public ownership in 1946. It acts as banker to the Government, and to commercial banks and as agent of the British Government for financial operations. The Bank of England is the central note-issuing authority and is responsible for the application of the Government's monetary policy to the other banks and financial institutions.

Commercial banks handle most of the domestic banking business in the United Kingdom. The majority of business is transacted by four members - Barclays, Lloyds, Midland and National Westminster Bank. Branch banking is very extensive and the London, Scottish and Northern Ireland banks own about 14,000 branches. Commercial banks' loans have been traditionally confined to short-term advances to individuals and industry, but in recent years the commercial banks have taken on a wider range of activities.

A variety of credit and investment facilities are provided by the discount market, the stock exchange, the insurance market, finance houses, merchant banks and trust companies.

There are some 35 British overseas and Commonwealth banks, many of which have their headquarters in London. There are about 25 U.S. banks, 10 Japanese banks and over 50 other foreign banks in the U.K. Canada has 17 bank branches in the U.K. with all major banks being represented.

Foreign Investment

The U.K. welcomes foreign investment except in certain highly technological industries (e.g. computers) and in general, foreign-owned concerns operate on an equal basis with U.K. owned competitors.

Except for compliance with exchange control rules and the problem of Industrial Development Certificates (licenses required for construction of new plants which are rarely granted now in congested areas) foreigners may establish or acquire enterprises in the U.K. and buy securities, land or mortgages without special license or permission.

The majority of foreign investments are made by organizing a new operation or making an offer for equity in an existing plant.

Most foreign investors find it more advantageous to establish subsidiaries rather than branch operations.

Eleven of the top one hundred companies in the U.K. are foreign owned companies. Foreign controlled operations account for about 10% of U.K. manufacturing output and 20% of all exports. In 1969 about \$11 billion of direct investment in the U.K. was owned by foreign corporations. The U.S. share amounted to \$6.5 billion.

At the end of 1967 Canadian long-term investments in the U.K. amounted to \$1.6 billion or 20% of total Canadian long-term investment abroad. Total Canadian direct investment in the U.K. amounted to \$0.5 billion or 13.5% of total Canadian direct investment abroad.

The total book value of foreign long-term investments in Canada at the end of 1967 was \$34.7 billion of which the U.K.'s share amounted to \$3.6 billion or 10%. Total direct investment in Canada at end of 1967 was \$20.7 billion of which the U.K.'s share was \$2.2 billion or 11%.

Tourism

The number of visitors to the U.K. appears to be increasing annually and the continuing increase in average expenditure per visitor results in a substantial income.

Visitors to the United Kingdom 1966-68 '000

<u>From</u>	<u>1966</u>	<u>1967</u>	<u>1968</u>
Sterling Area	1,061	1,118	1,186
Western Europe	1,643	1,822	2,123
Other foreign countries	1,263	1,349	1,519
Total	3,967	4,289	4,828
Total Expenditures (\$ millions)	565.7	607.6	728.6

Source: Europa Yearbook 1970

The principal countries from which visitors came in 1968 were the U.S. (691,837), France (423,101), Germany (266,209), the Netherlands (170,221), Canada (137,748) and Belgium (134,350).

In 1969, 26% more people visited the U.K. than in 1968 and receipts increased by 27%. In 1969, Canadian visitors to the U.K. totaled 209,877 while U.K. visitors to Canada totaled 143,562.

The Development of Tourism Act 1969 established an organization to promote tourism. This organization also has the power to give financial assistance to developing hotels and other tourist facilities in the U.K.

e. Energy

Coal still represents slightly over half of primary energy consumption in the U.K., but its share of the total energy market is decreasing. Oil, virtually all imported, has expanded rapidly to over 40% of total energy consumption.

The discovery of natural gas, recently, in the North Sea and northeast England have resulted in natural gas making an increasing impact on the energy market. Previous gas requirements were met by imports in liquified form.

Electricity consumption has been rising in recent years, except for 1967. Production of electricity in 1969 was 235.6 billion K.W.H. as compared to 223.4 billion K.W.H. in 1968.

The following table shows energy consumption in the U.K. for years 1967-69.

<u>Total Inland Energy Consumption</u> million therms*				
	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>% of Total 1969</u>
Gross Energy Consumption	76,287	78,799	81,353	-
Coal	42,895	42,715	41,573	51

Nuclear, hydro, electricity and natural gas	3,241	4,088	5,255	7

*Therm: Statutory unit of calorific value (100,000 B.T.U.)

Source: Annual Abstract of Statistics

f. Transportation

In the U.K. the railways, passenger transport in the London area and a large proportion of road passenger services are nationalized as are the two main airlines B.O.A.C. and B.E.A. Road haulage and coastal shipping are almost entirely in private hands and there are 20-30 independent transport airlines.

In 1969, about 6.1% of the working population was engaged in transportation and communications.

The dense passenger and freight traffic of Britain is carried mainly by road and rail, although coastal shipping and inland waterways are important in carrying bulk cargoes.

Goods Transported in Great Britain 1967-1969 thousand million ton miles

	<u>1967</u>	<u>1968</u>	<u>1969</u>
Total	72.9	75.2	76.1
Road	43.0	44.0	44.5
Rail	13.6	14.7	15.1
Coastal shipping	15.2	15.0	14.8
Inland waterways	0.1	0.1	0.1
Pipelines	1.0	1.4	1.6

Source: U.K. Annual Abstract of Statistics

There are over 200,000 miles of public highways in Britain and expenditures on new roads and improvements has been rising steadily. Total expenditures on highways in 1967 was \$722.6 million and in 1968 \$855.7 million. Vehicle traffic as a whole has increased 80% since 1958 while car traffic has increased over 150%.

1969	11,228	1,226	1,640	102

Source: U.K. Annual Abstract of Statistics

There are some 13,000 route miles of railway in the U.K. The responsibility for managing British railway affairs lies with the British Railways Board.

The most important development in recent years has been the completion in 1968 of the program to replace steam by diesel and electric engines. Other developments include high speed passenger services and the introduction of the "freight-liner" trains. The largest capital investment ever undertaken by British Railways, \$433.4 million, was the electrification of the line between London, Birmingham, Manchester and Liverpool. This project was completed in 1967.

There are over 300 ports in Britain. London, with 92 miles of waterway and 4,000 acres of dock, is the largest port in the Commonwealth. Among the chief commodities handled are petroleum, coal, timber and grain, vehicles and machinery. Liverpool, the second largest port in Britain handles a large proportion of Britain's exports to the Far East, and has extensive facilities for dealing with imports of grain, sugar, wool and other special cargoes.

Dover is Britain's most important port for short-sea voyage passengers and Southampton for ocean-liners.

Shipping 1967-1969
('000 net tons)

	<u>Entered</u>		<u>Cleared</u>

1968	122,670	26,259	66,818	82,172
1969	130,496	27,901	70,734	83,713

Source: U.K. Annual Abstract of Statistics

In the past ten years annual capital investment in port facilities has more than doubled.

The British Overseas Airways Corporation is engaged in long-haul airline operations around the world and the British European Airways operates services to over 80 places in Britain, Europe, North Africa and the Middle East.

Total capacity-ton-miles on all services has more than trebled in the last ten years. At Heathrow, London, freight traffic is increasing at an annual rate of over 19%. 1962 saw for the first time more air than sea passengers and this trend has continued.

Civil Aviation 1967-1969

	<u>Aircraft miles</u> '000	<u>Passengers</u> '000	<u>Mail</u> short tons	<u>Freight</u> short tons

1969	168,031	13,222	26,195	312,742

Source: U.K. Annual Abstract of Statistics

g. Communications

The Minister of Post and Telecommunications regulates the postal and public telecommunication services in the U.K. as well as broadcasting and television. Radio broadcasting is provided only by the British Broadcasting Corporation (B.B.C.). Television services are provided by the B.B.C. and by the Independent Television Authority (I.T.A.).

In 1969 there were approximately 13 million telephones. 15.8 million television licences (television and radio) were in operation plus 2.3 million for radio only.

FOREIGN TRADE

a. Foreign Trade Policy

Foreign trade has always been of vital importance to the U.K. economy. In 1969, the U.K. accounted for about 7% of total world trade.

Government policy has historically been liberal with respect to foreign trade and restrictions necessitated by wartime and post-war recovery were almost eliminated by 1960. Import controls do not exist except on cotton goods from low-cost labor countries and on some fruit and tobacco products. Quotas are provided for certain manufactured articles from U.S.S.R., Eastern European Communist countries and Japan and special import permits are required for these products. The Board of Trade may impose anti-dumping duties. The Import Deposit requirements were discontinued in December 1970.

The Government assists exporters by providing credit, and insurance facilities and by repayment of protective duties on goods which have been imported for re-export. It also arranges for many Trade Fairs and international promotions such as "British Weeks" in various countries to promote U.K. products.

b. Foreign Trade Patterns

U.K. imports and exports have increased steadily during the past five years, 1967 excepted, but the U.K. has long suffered an unfavourable balance of visible trade and in 1970 imports again exceeded exports. In 1970, U.K. imports were worth \$23.3 billion and exports were valued at \$20.8 billion.

Trend of U.K. Imports and Exports 1966-1970

	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Imports - value \$ billions	17.8	19.0	20.3	21.4	23.3
% change from previous year	+2.8	+6.7	+6.8	+5.4	+8.8
Exports - value \$ billions	15.7	15.3	16.4	18.8	20.8
% change from previous year	+6.0	-2.5	+7.1	+14.6	+10.6

The U.K. operates on a three-line tariff. As a member of GATT, it extends most-favoured nation treatment to other members of the Agreement; but the most favoured nations rate is also applied as the standard rate on imports from non-members.

As a member of E.F.T.A., the U.K. has a free trade agreement with other member countries - Austria, Norway, Denmark, Portugal, Sweden and Switzerland. She also has a free trade agreement with the Republic of Ireland.

As a member of the Commonwealth she has special Commonwealth preferential tariff agreements with the other countries in the Commonwealth.

U.K.'s foreign trade takes place mainly with four areas: the Sterling Area, the Commonwealth, E.F.T.A. and the E.E.C. During the past few years U.K. trade has become increasingly oriented towards Western Europe and in particular the E.E.C. with whom she is now negotiating to become a member.

U.K. Trade by Areas 1968-1970

	% of total					
	Imports			Exports		
	1968	1969	1970	1968	1969	1970
Sterling Area	28.5	28.9	27.1	28.0	27.7	27.5
Commonwealth	23.7	23.2	23.8	22.3	21.8	21.0
E.E.C.	19.7	19.4	20.1	20.2	20.8	21.7
E.F.T.A.	14.7	15.0	15.5	13.8	14.8	15.9
East Europe	3.8	3.9	4.0	3.1	3.1	3.2
U.S.	13.4	13.5	12.9	14.1	12.3	11.5
Canada	6.5	6.1	7.5	4.2	4.2	3.6

In 1969, the main suppliers of U.K. imports were the U.S.A. 13.5%, Canada 6.1%, West Germany 5.6%, the Netherlands 4.9% and Sweden 4%. The chief markets for U.K. exports were the U.S.A. 12.3%, West Germany 5.7%, Australia 4.4%, France 4.3% and Canada 4.2%.

In 1970, the U.K. imported products to the value of \$23.3 billion, an increase of 8.8% over 1969.

Britain relies upon imports for about half of her total consumption of foodstuffs and nearly all the raw materials needed for industry.

U.K. Imports by Commodity 1968-1970

	<u>% of Total</u>			<u>Imports 1970</u>
	<u>1968</u>	<u>1969</u>	<u>1970</u>	<u>\$ billion</u>
Food and live animals	21.7	21.0	20.7	4.8
Beverages and tobacco	2.4	2.2	2.0	0.6
Crude material excl. fuels	14.5	14.2	13.9	3.2

Misc. manufactured goods	5.9	6.2	6.4	1.4
Goods not classified by kind	<u>1.4</u>	<u>1.0</u>	<u>1.2</u>	<u>0.2</u>
Total	100.0	100.0	100.0	23.3

In 1970, imports of food, live animals and beverages amounted to 23% of total imports, raw materials 25% and finished goods 23%.

The U.K. is an important market for metals and ores, textile raw materials, and petroleum. Wood, lumber and cork, as well as pulp and paper are also significant imports.

The Sterling and Commonwealth Areas provide half of the U.K.'s imports and the E.E.C. and E.F.T.A. provide 20% and 15% respectively. The U.S. is the U.K.'s largest single supplier accounting for 12% of total imports. Canada supplied 7.5% of total U.K. imports in 1970.

In 1970, U.K. exports were worth \$20.8 billion, an increase of 10.6% over 1969.

The U.K. is primarily an exporter of manufactured goods.

U.K. Exports by Commodity 1968-1969

	% of Total			Value 1970
	<u>1968</u>	<u>1969</u>	<u>1970</u>	<u>\$ million</u>
Food and live animals	3.01	3.00	3.09	643.2
Beverages and tobacco	3.69	3.21	3.28	683.7

Mineral fuels, etc.	2.62	2.37	2.56	533.7
Animal, veg. oils & fats	0.10	0.12	-	23.9
Chemicals	9.49	9.51	9.74	2,028.1
Basic manufactures	24.53	25.63	24.67	5,133.6
Machines & transport eqpt.	41.46	41.53	40.94	8,517.1
Misc. manufactured goods	8.38	9.00	9.06	1,885.5
Goods not classified by kind	2.56	2.35	3.30	672.7
	<u>100.00</u>	<u>100.00</u>	<u>100.00</u>	<u>20,801.4</u>

In 1970, the exports of manufactured goods accounted for one-half of total exports, and chemicals for 10%.

The U.K. is a major supplier of agricultural machinery, motor vehicles, aircraft, metal manufactures, electrical apparatus and office machinery. Chemicals and textiles are also important exports. U.K. exports of food, whisky excepted, and raw materials are negligible. The Sterling and Commonwealth markets take almost one-half of U.K. exports and the E.E.C. and E.F.T.A. take 21% and 15% respectively. The U.S. is the largest single purchaser, taking 12% of total exports. Canada purchased 3.5% in 1970.

CANADIAN TRADE WITH THE U.K.

a. General

In 1970, Canada's exports to the U.K. amounted to \$1,479 million, an increase of 34.8% over 1969: this represented 8.9% of total Canadian exports. In 1970, imports from the U.K. to Canada amounted to \$738 million, a decrease of 6.8% from 1969. Imports from the U.K. accounted for 5.3% of total Canadian imports in 1970. The significant increase in exports in 1970 over 1969 may be accounted for by the fact that 1969 exports were less than anticipated due to strikes in Canadian mines.

Canada and the U.K. have traditionally been important trading partners and in 1969 Canada was the U.K.'s second largest single supplier after the U.S. The U.K. is Canada's largest single market after the U.S. The balance of trade has continuously been in Canada's favour. The following table shows trade between these two countries during the past decade:

Canadian Trade with the U.K. 1960-1970

Year	<u>Exports</u>			<u>Imports</u>		
	Value Millions	Index 1960=100	% of Total Exports	Value Millions	Index 1960=100	% of Total Imports
1960	915.3	(100)	17.4	588.9	(100)	10.8
1961	909.3	(99)	15.8	618.2	(105)	10.7
1962	909.0	(99)	14.7	563.0	(96)	9.0
1963	1,006.8	(110)	14.8	526.8	(90)	8.0
1964	1,199.7	(131)	14.8	573.9	(98)	7.7
1965	1,174.3	(128)	13.8	619.0	(105)	7.2
1966	1,122.5	(123)	11.1	644.7	(109)	6.5
1967	1,169.0	(127)	10.5	673.0	(114)	6.1
1968	1,209.5	(132)	9.1	696.0	(118)	5.6
1969	1,096.5	(120)	7.5	790.9	(135)	5.5
1970	1,479.9	(161)	8.9	738.2	(127)	5.3

Source: Dominion Bureau of Statistics, 1968-1970
Canada Year Book, 1960-1967

With the exception of minor fluctuations, Canadian trade with the U.K. during the past ten years has shown an upward trend. By 1970, the value of exports had increased 61% over 1960, while imports increased 27%. In 1960, exports to the U.K. exceeded imports by 56%, while 1970 exports exceeded 1960 imports by 100%, thus maintaining Canada's favourable trade balance. However, as a percentage of total Canadian trade, U.K. participation has decreased steadily. In 1960, Canada's exports to the U.K. represented 17.4% of total Canadian exports but only 8.9% in 1970. In 1960 imports from the U.K. accounted for 10.8% of total Canadian imports but decreased to 5.3% in 1970.

b. Canadian Exports to the U.K.

Changes have also occurred in the types of products traded between the two countries. The following table shows exports by commodity groupings during the past five years:

Canadian Exports to the U.K. by Commodity Groupings 1966-1970
(\$ Millions)

	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>

Source: Dominion Bureau of Statistics

Between 1966 and 1970 the value of exports in the category live animals, 1968 excepted, and special transactions changed very little, but that of food, feed and beverages showed a decline. The categories crude materials inedible, fabricated materials inedible and end products inedible, on the other hand, all showed significant increases. In 1966, these last three categories accounted for 75% of total Canadian exports to the U.K. and in 1970 their share had risen to 83%. The share of food, feed, beverages and tobacco declined from 26% in 1966 to 17% in 1970, while the share of the other categories remained approximately the same.

In 1970, Canadian exports to the U.K. totalled \$1,479 million. Over 90% of this total consisted of agricultural products, raw materials and semi-manufactured products. Principal products exported included wheat, tobacco, wood pulp, metal ores and newsprint. Other important exports were lumber, plywood, cheese and barley.

Principal Canadian Exports 1969-1970
(\$ millions)

	<u>1969</u>	<u>1970</u>
Barley	13.9	25.6
Wheat, except seed n.e.s.	87.0	89.4
Soya bean oil, cake and meal	13.8	15.3
Tobacco, flue-cured	54.2	47.1

Ontario Exports to the U.K.*

Ontario exports to the U.K. in 1969 amounted to \$379 million compared to \$456 million in 1968. This represented 34.5% of total Canadian exports to the U.K. in 1969. As noted before, the decrease in Ontario's exports may be accounted for by the sharp decline in exports of crude materials such as copper ore and nickel ore due to mining strike activity.

Ontario Exports to U.K. 1966-1969
(1966=100)

<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>
100	112.6	121.3	100.8

The U.K. is an important market for "crude materials, inedible" exports and exports of "fabricated materials, inedible" from Ontario, as well as agricultural products.

*Ontario exports 1970 figures are not yet available.

Special transactions, trade	13.4	9.3	16.0	13.7	11.1

Source: Dominion Bureau of Statistics

The import value of all categories has shown increases between 1966 and 1970 with the exception of crude materials, inedible which declined steadily. The major growth has been in the categories of fabricated materials, inedible and end products, inedible.

The share of each category to total Canadian imports remains approximately the same in 1970 as in 1966 with the exception of end products, inedible which increased from 58.9% to 62.3%. In 1969, imports from the U.K. amounted to \$791 million. Some of the major products imported are listed below, including whisky, hardtop sedans, wool tops, and ceramic tableware. Other imports of importance are industrial computers and parts, wheel tractors, acrylic fibres, motor vehicle parts and accessories, diesel and semi-diesel engines, gas turbines and parts, turbo generators and parts, biscuits and cookies.

Principal Canadian Imports from the U.K.
1968-1969
\$ million

	<u>1968</u>	<u>1969</u>
Biscuits and cookies	12.8	4.4
Whisky	9.9	11.3
Wool tops	12.1	11.2
Acrylic fibre	4.7	7.4
Double knit fabric	1.9	7.9
Turbo-generator sets and parts	2.2	6.5
Sedans, new n.e.s.	-	62.2
Parts & accessories for motor vehicle n.e.s.	7.1	10.3
Civil aircraft, 2 engines or less	2.8	10.4
Parts of aircraft engines	15.0	11.5
Tableware, ceramic	14.0	17.1

Source: DBS

During January and February 1971, Canada's exports to the U.K. amounted to \$225 million compared to \$210 million for the same period in 1970. Imports in January and February 1971 amounted to \$107 million compared to \$109 million in January and February 1970.

British Membership in the E.E.C. and its Implications for Canada's Trade

1. Introduction

While prospective U.K. membership will not fundamentally alter the characteristics and course of development of the European Economic Community, its short- and medium-term repercussions are likely to be significant both within the newly expanded E.E.C. and outside it. For Canada, the implication of this new customs union is further complicated by the loss of Commonwealth preferential treatment accorded by the U.K.

Broadly speaking, the impact of U.K. membership in the E.E.C. is likely to be greater on Canada-U.K. trade than on Canada-E.E.C. trade. This is so, partly because the U.K. represents a market for Canadian exports which is about 25% greater than the whole of E.E.C., and partly because of the Commonwealth preferential treatment Canada is enjoying in the U.K. market. In "end products, inedible", Canadian exports to the U.K. are smaller than Canadian exports to E.E.C., as indicated in the following comparison.

Canadian Exports of "End Products, Inedible" to U.K. and E.E.C. \$ million

	<u>1969</u>	<u>1970</u>
U.K.	69.5	106.9
E.E.C.	89.6	161.0

With the U.S. launching a series of new, protectionist trade legislations, it is feared that a general reversal is taking place in the free trade atmosphere initiated by the "Kennedy Round" tariff negotiations. As Canada, and Ontario in particular depend on trade for their development, it is important to examine the implications of U.K. membership for Canada and Ontario.

2. E.E.C.

The economic benefits, from the viewpoint of the E.E.C., of having the U.K. as a member is seldom disputed: the additional market she will bring: the advanced technological know-how; the financial contribution to the European Agricul-

tural Guidance Fund; and the increased attractiveness of the U.K. now that she has resolved in large measure her balance of payments problems. Although France has in the past vetoed the British application for membership twice, the basis for her objection was more political than economic in nature, namely, that the U.K. would be the "Trojan Horse" for American domination of Europe. The present negotiations are aimed at least partly to ensure that the U.K. complies with the rules and regulations of the E.E.C. with the shortest possible period of adjustment.

In 1968-1970, Canadian trade with the E.E.C. amounted to about \$2 billion in magnitude. In 1970, Canadian exports to the E.E.C. were \$1,189 million while Canadian imports amounted to \$805 million.

Canadian Exports to the E.E.C. 1968-70

	<u>1968</u>	<u>1969</u> \$ million	<u>1970</u>
West Germany	228.7	277.4	383.7
France	81.5	124.7	154.2
Italy	131.2	133.7	184.0
Netherlands	178.8	185.0	277.2
Belgium & Luxembourg	126.6	116.2	189.9
Total	746.8	837.0	1,189.0

Canadian Imports From the E.E.C. 1968-70

	<u>1968</u>	<u>1969</u> \$ million	<u>1970</u>
West Germany	298.9	354.7	370.9
France	121.6	153.7	158.4
Italy	114.5	141.1	145.0
Netherlands	69.1	78.7	78.9
Belgium & Luxembourg	57.5	60.9	51.5
Total	661.6	789.1	804.7

Compared with Canadian exports to the U.K. alone, this figure is disproportionately small, especially in view of the difference in economic magnitudes shown below.

Comparison Between the E.E.C. and the U.K., 1969

	<u>Popula- tion</u> Mil.	<u>G.N.P.</u> \$ Bil.	<u>Exports</u> \$ Bil.	<u>Imports</u> \$ Bil.	<u>Imports From Canada</u> \$ Bil.
Belgium	9.6	20.7	8.1	8.3	0.1
France	50.3	130.6	13.7	16.2	0.1*

Luxembourg	0.3	0.7	2.0	1.7	—*
Netherlands	12.9	28.2	10.0	11.0	0.2
Total E.E.C.	185.0	426.3	76.2	75.9	0.8
U.K.	55.5	109.5	23.3	22.8	1.1

Source: IMF: International Financial Statistics, Feb. 1971,
U.N. Monthly Bulletin of Statistics, Jan. 1971 and
D.B.S., Trade of Canada.

* Canadian exports to Belgium and Luxembourg are listed together
in the D.B.S. table.

As can be seen from the table above, the E.E.C. is over 3 times
as large as the U.K. in population and foreign trade and almost
4 times as large in G.N.P. In spite of this fact, its imports
from Canada are only three-quarters as much as U.K. imports
from Canada (estimated at \$1.4 billion in 1970).

Ontario exports to the E.E.C. amounted to \$149 million in 1969,
an amount less than 40% of Ontario exports to the U.K. (\$379.5
million).

Ontario Exports to the E.E.C. and U.K.

	<u>1968</u> \$ thousand	<u>1969</u> \$ thousand
West Germany	54,206	63,144
France	15,715	21,815
Italy	19,492	15,987
Netherlands	24,455	23,585
Belgium and Luxembourg	28,942	24,885
Total E.E.C.	142,810	149,416
U.K.	456,651	379,507

These disproportionately small exports to the E.E.C., compared
with the U.K., can partly be attributed to the Commonwealth
preference treatment enjoyed by Canadian exports to the U.K.

But more importantly, it reflects the lack of concerted and sustained effort on our part to develop the E.E.C. market.

The main bulk of Canada's exports to the E.E.C. are raw and fabricated materials, such as minerals, pulp and paper, plastic materials, and iron and steel. The share of manufactured goods in the total Ontario and Canadian exports are relatively small.

When the U.K. joins the E.E.C., Canadian trade with the E.E.C. will not be significantly affected, for a number of reasons: first, U.K. tariffs on Canadian exports are generally far less than the tariff that the E.E.C. imposes on Canadian goods, and the E.E.C. is unlikely to raise their tariffs after the U.K. has become a member. Secondly, most of the imports are raw and fabricated materials, and the E.E.C. is unlikely to increase tariffs on these items. Only when the E.E.C. shifts its purchases of Canadian goods and begins to purchase from the U.K. instead, will Canadian exports be adversely affected, but this "trade diversion" effect is not expected to be great.

In agriculture, where Canadian exports are likely to be most vulnerable to short-run losses such as the elimination of Commonwealth preferential treatment in the event of U.K. membership, Canada is negotiating a new settlement with the E.E.C. As many policy makers within the E.E.C. are dissatisfied with the present system of agricultural subsidies, there is a possibility of some changes in E.E.C. agricultural import policy. The E.E.C. levies tariff on the imports of agricultural products, and then uses the revenue to subsidize European exports of these products in world markets. This constitutes a trade barrier for Canadian exports to Europe, and at the same time interferes with free trade in world markets. At the same time, this policy has resulted in the build-up of large stockpiles in surplus agricultural products such as butter, and in artificially high prices for these commodities, costing the Community members some \$2.5 billion in 1969 alone. Because of this, there are strong pressures for reform.

In short, the pattern of Canadian trade with the E.E.C. is not likely to experience any severe change, and the pressing need to develop greater exports in manufactured goods remains constant.

3. The U.K.

From the point of view of the U.K., the costs of joining the E.E.C. are more easily quantifiable than the benefits.

One of the most important potential gains from membership is the psychological reassurance of an enlarged market for British manufacturers. The value of this has been much deflated because of successive tariff cuts: the post-Kennedy Round tariffs will be low enough for the U.K. (on the average below 8%) to treat the European market as one market, whether the U.K. joins the E.E.C. or not. The real obstacle to a European-

wide merger lies in the institutional and political sphere rather than in tariffs.

The recent study on the effect of E.E.C. membership for the U.K. published in the National Institute Economic Review, argues that since the E.E.C. began its operations in 1959, the growth rate of the E.E.C. has slowed, and that therefore there is little justification for the U.K. to seek membership in the hope of obtaining added impetus for her own economic growth, particularly in view of the quantifiable costs of membership. However, the rate of growth of productivity in the E.E.C., compared with the O.E.C.D., shows that the E.E.C. has been remarkably successful:

<u>Rate of Growth in Productivity</u> <u>Output Per Employee, Annual Rates in %</u>		
	<u>1950-58</u>	<u>1958-69</u>
Belgium	2.4	3.7
France	3.9	5.3
Germany	6.3	4.9
Italy	4.0	6.1
Netherlands	2.9	4.3
<hr/>		
E.E.C.	4.2	5.2
<hr/>		
Other O.E.C.D. Europe	2.5	3.7
<hr/>		
Total O.E.C.D.	2.8	4.2
<hr/>		

Source: National Institute Economic Review

Great interest is shown in the field of technological co-operation. But it is also argued that the U.K. need not join the E.E.C. in order to participate in such cooperation. In any case, it has been reckoned that the scientific sophistication of the U.K. is such that the gains from technical cooperation would accrue mostly to the European countries, particularly so in the field of nuclear research.

The real cost consists of the cost due to trade diversion and the cost in the form of transfers, arising from the required British contribution to the Common Agricultural Policy and other administrative costs of the E.E.C. The cost of trade diversion had been estimated by Sir R. Russell, the Chairman of the Commonwealth Producers' Organization, to be as high as £300 million per year. As for the amount of U.K. contribution to the European Agricultural Guidance Fund, it is estimated by the Confederation of British Industry to be in the neighborhood of £300 million by 1977. In addition to the transfer of £600 million, which involves a reduction in domestic spending, there is a cost that results from the possible deterioration in the terms of trade. Based on the estimates of trade elasticities,

it was calculated that the deterioration of 3% in the terms of trade is required to make up for the loss of £600 million in transfer. Since the deterioration of 3% at today's trade volume amounts to about £250 million, the total financial cost is then in the area of £850 million.

This, at first sight, would seem to be a sizeable price-tag; but if one accepts the projected 1977 G.N.P. of £65,000 million as being reasonable and realistic, then £850 million amounts to only 1.3% of G.N.P.

As for the losses due to trade diversion from Commonwealth sources to E.E.C., from the U.K. point of view, its importance has declined considerably over the last decade: in 1959, the share of Commonwealth imports was 35% of total U.K. imports, but in 1968, this share had declined to 24%.

The U.K. represents a market of \$379 million for Ontario (1969) and \$1.1 billion for Canada (1969); Canadian exports in 1970 were about \$1.5 billion. Over the past decade, the U.K. has steadily declined in its share in Canada's exports: in 1960 U.K. accounted for 17% of total Canadian exports, compared to 9% in 1970. Consequently, the loss in Canada's exports due to the U.K.'s membership in the E.E.C. will not be as painful as it would have been, had it taken place 10 years ago. Still, since Canada is enjoying Commonwealth preferential treatment in the British market, the loss of such advantage is expected to be significant, at least in the short-run.

Some foodstuffs and basic materials enter the U.K. free of duty from all sources - e.g. mutton, lamb, wheat, metallic ore, natural rubber, wool and cotton. Of the remaining foodstuffs, the tariff is about 10%, but most of these enter free of duty from Commonwealth sources. The full duties of manufactured goods range from 10% to 33 1/3%, but again many of these enter free from Commonwealth sources. As for alcoholic beverages, tobacco, fuels, and other items that are subject to revenue duties, Commonwealth imports are subject to less than the full rate. The implications of the U.K.'s membership in the E.E.C. to Canadian trade will be discussed below.

4. Implications for Canada's Exports to U.K.

Major Canadian exports which enter the U.K. free of duty include wheat, metallic ores, pulp and newsprint. On the whole, the weighted average of preferential margin on foodstuff is about 10%, while the margins on manufactures, when they exist, are generally higher, ranging as high as 33 1/3% for some chemicals. The overall average margin on all imports, is about 5 1/2%.

The largest commodity group exported by Canada to the U.K. is "fabricated materials, inedible", which amounted to \$534 million in 1969 and \$800 million in 1970. The largest individual items

are copper, refinery shapes (\$90 million in 1969), aluminum pig ingots, shot slabs, etc. (\$73 million), newsprint paper (\$16 million), plywood and veneer (\$33 million), etc. Exporters of these items have expressed their concern that the entry of the U.K. into the E.E.C. might seriously threaten their industries. For example, Canadian pulp and paper products would be subject to the Common Market External Tariff, and many administrative procedures would also contribute to restrict the entry of Canadian pulp and paper products.

The group "food, feeds, beverages and tobacco" amounted to \$260 million in 1969 and \$258 million in 1970. With the exception of tobacco, which is already subject to protective tariff, Canadian exports in this group will suffer, should the U.K. succeed in joining the E.E.C.

As for "crude materials, inedible", which is almost a third of a billion dollars, British membership in the E.E.C. would not affect it significantly, because most of the items under this group are not dutiable under the Common Market External Tariff. The group "end products, inedible" accounts for less than 10% of total Canadian exports to the U.K., and are not overwhelmingly important. On the whole, it can be concluded that about 70% of Canada's exports to the U.K. would be affected by the U.K.'s membership in the E.E.C.

Ontario Exports to the U.K.

Ontario exported to the U.K. \$456 million in 1968 and \$379 million in 1969, accounting for slightly over a third of total Canadian exports to the U.K.

The largest group in Ontario's exports to the U.K. is "crude materials, inedible". The share of "end products, inedible" is considerably larger than in the case of Canada as a whole. Also, this group is the one that is expanding most rapidly and consistently. Since many of the commodities in this group are subject to the Common Market External Tariff, the rapid growth of this group may be slowed considerably, at least in the short run, should the U.K. join the E.E.C. Exports of fabricated materials and food, feeds, beverages and tobacco account for about half of Ontario's exports to the U.K. As agricultural products and fabricated materials are enjoying preferential treatment, they may be adversely affected by the U.K. membership in the E.E.C.

The final effect of the British entry into the Common Market will not be known until the terms under which Britain enters are settled, and a few years will be needed after that, to properly assess the actual extent of its impact on Canada's trade with the U.K. On the whole, it can be said that the commodity groups that may potentially be affected by British entry into the E.E.C. account for about 60% of Ontario exports to the U.K.

Possible Development and Canada's Alternatives

The overall effect of British membership in the E.E.C. is likely to be adverse for Canadian exports in the short run. But in the medium and longer runs, the enlarged and strengthened trading base resulting from Britain's European involvement should contribute to enhance, rather than inhibit, the expansion of Canada's sales to the U.K. A trade policy, while dealing with short-run exigencies and problems, should not neglect medium and long run considerations.

Many short run policy measures are being recommended. Subsidies for the cost of modernizing transportation, especially in such bulk commodities as pulp and newsprint, new provisions in corporation taxes granting resource allowances to industries which need a large amount of pollution control expenditures, and others, are being recommended by several industrial groups.

One of the possible adverse effects in the medium and long runs is the possible shift in American investment preference: the increasing European attraction for U.S. capital may result in the expansion of U.S. investment in Europe, at the expense of U.S. investment in Canada. For this and other reasons, Canada will presumably be under strong pressure to seek free trade with the U.S., or to seek the establishment of a NAFTA (North Atlantic Free Trade Area) or a PAFTA (Pacific Free Trade Area).

Basically, whether the U.K. joins the E.E.C. or not, the future of Canada's exports depends on the success of three vital measures: (1) improvement in productivity and international competitiveness, (2) freer world trade, and (3) greater diversification in her international markets.

Market Possibilities for Canadian Exporters

Trade with Canada has been decreasing the past few years as the U.K. has become more oriented towards Western Europe. If as anticipated she becomes a member of the E.E.C. Canada will face even stiffer competition from these countries as well as the loss of the preferential tariffs she now enjoys as a Commonwealth country. However, many goods enter duty free to the E.E.C. and 38% of Canadian exports to Britain would remain so if Britain enters the E.E.C.

Competition from E.E.C. countries and the disadvantage of a distant market can be overcome by a stronger promotional effort on the part of Ontario manufacturers, provided they can offer products which are competitive in terms of price, or sophistication or technology.

At the moment there appears to be a market for process control instruments and testing and measuring equipment with sales depending more on salesmanship rather than price. There also seems to be a growing demand for optical instruments. Chemical

elements and compounds are also in demand as are plastics and synthetic resins.

Other sales potentials include packaging machinery and filtration and separation machinery and equipment.

As in other developed countries the U.K.'s concern about pollution has created a market for anti-pollution equipment. Ontario exporters could also investigate opportunities in facilities needed in the U.K. to meet the requirements of increasing tourist trade.

Marketing Channels in the U.K.

Consumer goods may be distributed in a number of ways: through wholesalers, through producers own selling organizations (own retail outlets and mail order business) or directly by producers to retailers. Wholesale channels are particularly used in the distribution of textiles, agricultural produce and foodstuffs.

In retail business, a notable feature is the continuing expansion of large multiple firms (organizations with 10 or more branches). Other major developments have been the increase in self-service trading (super-markets, automatic vending machines) and mail order trading. The latter has been one of the most rapidly growing forms of selling.

Trade Fairs play an important role in exposing products to the market and are an efficient and quick way to compare prices and qualities of competitive products. For overseas participants it presents the opportunity to meet potential agents and distributors. Over 200 trade fairs take place each year in the U.K.

The advertising of products is done mainly through the press and T.V. Advertising is carried out by agencies, which also provide marketing information, consumer research and other services. It is regulated by the Advertising Standards Authority whose objective is to promote and enforce a high standard of advertising.

Agency Agreements

In some countries governments have introduced legislation expressly governing the relationship between agent and principal as a measure to protect the agent. However, the U.K. like the majority of countries has not enacted such legislation and the normal law of contract applies to agency agreements, with their own written clauses or standard business procedure governing any possible future disputes.

Trademarks

Trademark registrations are valid seven years from application filing date and are renewable for 14 year periods. Registration is cancellable anytime on proof that it was obtained by fraud, is misleading or deceptive. Mark is removable from register if not used continuously for five years.

Patents

Invention patents are valid in the U.K. 16 years after application, and renewable in 5 or ten years where inadequately remunerated. Compulsory licensing is possible 3 years after grant if the patent is not adequately worked; revocation is possible 2 years after first compulsory license.

TABLE I

ONTARIO DOMESTIC EXPORTS BY COUNTRY AND COMMODITY 1968-1969

GROUP	COMMODITY	\$000 ONTARIO		\$000 CANADA		ONTARIO % OF CANADIAN		ONTARIO % OF CHANGE 1968-1969
